

Gravitational waves research in the world

Gravitational astronomy: a new window on the Universe

Tomasz Bulik has been working on radiation from black holes and neutron stars. He is taking part in the HESS telescope project

<http://www.mpi-hd.mpg.de/hfm/HESS/>

and also in the search for gravitational waves using the VIRGO detector

<http://www.ego-gw.it/virgodescription/>

Official ceremony
